Heuristic Evaluation

This is the heuristic evaluation for the project "Shoppingx" of group 19. The project was received on the 28th of November and This evaluation was delivered on the 3rd of December 2022.

Nº	Problem	Heuristic	Description	Severity	Solution	Screenshot
1	Sroll view	Visibility of system status	When a list exceeds the number of items visible in the space, there is no intuitive view to alert the user that is possible	Low	Add a scrolling bar next to the lists	Pic.1
2	Absent of destructive actions	User control and freedom	When editing a recipe you can delete by mistake an ingredient and forget what it was	Medium high	Add a pop up after the user deletes confirming that action and when exiting the recipe inform what was erased or added to the recipe.	Pic.2
3	Cannot see the buttons	Consistency and standards	When adding items to a recipe the buttons scroll down.	Low	Separate the list from the buttons so they done suffer from adding items.	Pic.4
4	Duplicated items	Error prevention	When adding a person to a list, you can add the same person more than once; When adding an ingredient to a recipe you can also add the same ingredient more than once.	Medium Low	Making a restriction for adding the same person or ingredient more than once and adding a pop up informing the user that he has already done that action.	Pic.5 Pic.6
5	Cannot change items quantity	Error prevention	When inserting an item, the user cannot change the quantity later if there is change of mind	Medium Low	Permit the change of quantity	Pic.3

Observation

When a list is created, the date inserted is not the same that is shown when consulting (it always shows 12th December, 9:00 PM) . Also, the name list inserted goes by default to the "Next person to go to shop".

Snapshots

Pic 1: It was added 4 people, but it looks like there are only 3.

Pic 2: When deleted, there is no going back.

Pic 3: Same item inserted, could just be a change of quantity.

Pic 4: The create bottom disappeared because the list increased

Pic 5: The person was inserted more than once.

Pic 6: An ingredient can be inserted more than once.
